

Non-Contact Infrared Digital Forehead Thermometer with LCD Display

The **JXB-178** Non-Contact Thermometer features a large sized-LCD screen, high brightness with a backlight, and a clear display with easy-to-read data that adopts high precision infrared sensors for fast and accurate measurement of body temperature, as well as physical objects and liquids. Its non-invasive features make it ideal for measuring those in the workplace, at public establishments like restaurants, and at home for family members, with virtually no inconvenience.

- NON-Contact Measurements
- One Second Testing
- Quick and Accurate
- Body Temperature
- Surface Temperature
- Ambient Temperature
- High Temperature Alarm
- 32 Test Data Memory
- Three Color Backlights

- High-precision probe: Collect multiple temperature data in 1 second, the infrared sensor core algorithm gives you accurate and real data
- 3-in-1 clinical thermometer: body, surface and ambient temperatures
- Suitable for families and hospitals
- Infrared thermometer equipped with advanced technology and highly sensitive sensors. Accurate readings in 1 second. Range of accuracy is only $\pm 0.2^\circ\text{C}$ (only $\pm 0.4^\circ\text{F}$). Note: To avoid cross-infection, please avoid direct contact with skin
- Memory function records temperature value of the last 32 times and tracks temperature fluctuations. Auto shut-down within 7 seconds to save battery power
- LCD display to get measurements easily in the dark
- U.S. Customer Support
